Digital Cinema Mastering

Release Notes

QubeMaster Xpress 3.0.1.4 Release Notes

Jan, 2024

Bug Fixes

- Fixed bug where sign-in or sign-out was unsuccessful due to an invalid Internet connection check.

QubeMaster Xpress 3.0.1.3 Release Notes

June, 2023

Bug Fixes

- Corrected a certificate validation failure that would prevent sign-in to Qube Wire and thus limit the application functionality.

QubeMaster Xpress 3.0.1.2 Release Notes

August, 2021

What's new

- Added an option to upload the output CPL file to QubeWire.
- The user can now choose whether to upload the output content to Qube Wire or not. By default, content is no longer automatically uploaded.
- The output content must be uploaded to Qube Wire when encryption is enabled.
- Removed the ability to input (previously deprecated) Flash Video content

QubeMaster Xpress 3.0.1.1 Release Notes

March, 2018

What's new

- QubeMaster Xpress is now free to use and therefore requires no license activation
- Registration and sign-in to www.qubewire.com is required in order to fully activate the software and prevent the watermarking of encoded content
- Registration and sign-in to www.qubewire.com is required in order to enable encryption support.
- The installation process has been simplified, and the installer now includes all the required dependencies.

Bug Fixes

- Incorrect Date-time format was present in the CPLs of Interop DCPs created on systems with non-conformist Date-Time settings. This is fixed.
- Country specific Ratings are now correctly displayed for all types of content – not just features and advertisements.
- In some specific cases audio channel information was not updated correctly in the CPL naming. This is fixed.

Known Issues

- Support for Flash Video (.flv file extension) is deprecated and will produce abnormal preview and encoding results.
- Loading of multiple still images may take over 20 seconds.
