

Release Notes – version 3.0.1.1 & 3.0.1.0

March 2018

Features:

1. QubeMaster Xpress is now free to use and therefore requires no license activation (3.0.1.0)
2. QubeMaster Xpress requires a sign-in to www.qubewire.com to function as an activated software without a watermark on encoded content (3.0.1.0)
3. QubeMaster Xpress requires a sign-in to www.qubewire.com to enable encrypted DCPs (3.0.1.0)
4. QubeMaster Xpress installation process has been simplified – the installer now includes all the required dependencies. (3.0.1.0)

Fixes:

1. Incorrect Date-time format was present in the CPLs of Interop DCPs created on systems with non-conformist Date-Time settings. This has been fixed in version **3.0.1.1**
2. Country specific Ratings are now correctly displayed for all types of content – not just features and advertisements. (3.0.1.0)
3. In some specific cases audio channel information was not updated correctly in the CPL naming – this has been fixed. (3.0.1.0)

Know issues:

1. The preview will be black for .flv files.
2. The output will be jerky for .flv input.
3. Loading of multiple still images will take approximately 15 to 20 seconds.
